DOCUMENT PRODUCTION DATE:	11 March 2021

What is this product?

Type

Unit linked investment fund. The value of the Vitality Invest Life Insurance Policy may be linked to this fund.

Objectives

The fund aims to deliver long terms returns (over at least 5 years) by investing in a blend of actively managed and index-tracking strategies. The fund aims to remain within a lowest-medium risk profile, broadly in line with the Dynamic Planner 4 rating on their 1-10 risk scale.

The Fund will primarily invest in a diversified portfolio of global assets. These assets may include bonds, shares (equities), money market instruments and bank deposits.

The Fund is likely to have a mix of lower- and medium-risk investments such as bonds, cash and cash-type assets and higher-risk investments such as UK and overseas equities.

The actively managed strategies will invest across a range of fund managers.

Any income generated is reinvested in the fund.

The base currency of the Fund is Sterling.

Intended retail investor

Customers who wish to invest for the medium term, at least 5 years. They will require diversification of their investment across different asset classes, geographical regions and investment management techniques. Customers will be looking to access these assets through some exposure to lower cost index tracking investments.

What are the risks and what could I get in return?

Summary Risk Indicator:

1	2	**3**	4	5	6	7

Lower risk ← → Higher risk

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this fund compared to other funds. It shows how likely it is that the fund will lose money because of movements in the markets or because we are not able to pay you. We have classified this fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

This fund does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme. The indicator shown above does not consider this protection.

Performance scenarios

INVESTMENT: £10,000		1 YEAR	3 YEARS	5 YEARS (recommended holding period)
Stress scenario	What you might get back after costs	£9,105	£8,705	£8,738
	Average return each year	-8.95%	-4.52%	-2.66%
Unfavourable scenario	What you might get back after costs	£9,812	£10,459	£11,362
	Average return each year	-1.88%	1.51%	2.59%
Moderate scenario	What you might get back after costs	£10,665	£12,075	£13,671
	Average return each year	6.65%	6.49%	6.45%
Favourable scenario	What you might get back after costs	£11,551	£13,867	£16,353
	Average return each year	15.51%	11.51%	10.34%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest £10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances and does not take into account the situation where we are not able to pay out.

The figures shown include all the costs of the fund itself, but do not include all the costs that you pay to your financial adviser or for the VitalityInvest Life Insurance Policy. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows the impact the total costs you pay will have on the investment return you might get. The total costs take into account any one-off, ongoing and incidental costs for the fund.

The amounts shown here are the cumulative costs of the fund, for three different holding periods. The figures assume you invest £10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

INVESTMENT: £10,000 SCENARIOS	IF YOU CASH IN AFTER 1 YEAR	IF YOU CASH IN AFTER 3 YEARS	IF YOU CASH IN AFTER 5 YEARS (recommended holding period)
Total costs	£88	£300	£572
Impact on return (RIY) per year	0.88%	0.88%	0.88%

Composition of Costs

The table shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.
- These figures do not include the cost of the VitalityInvest Life Insurance Policy. Please see the Key Information Document for the VitalityInvest Life Insurance Policy for more details. The figures also do not include the costs of any adviser charges you've agreed with your financial adviser. Please speak to your financial adviser for more information.

ONE-OFF COSTS	**Entry costs**	0%	The impact of the costs you pay when entering your investment.
	Exit costs	0%	The impact of the costs of exiting your investment.
RECURRING COSTS	**Portfolio transaction costs per year**	0.21%	The impact of the costs of us buying and selling underlying investments for the fund.
	Insurance costs	0%	The impact of the amount you are paying to buy insurance protection.
	Other ongoing costs per year	0.67%	The impact of the costs that we take each year for managing your investments.
INCIDENTAL COSTS	**Performance fees**	0%	The impact of the performance fee.
	Carried interests	0%	The impact of carried interests.

How long should I hold it and can I take money out early?

Recommended minimum holding period: 5 Years

The recommended minimum holding period is 5 years because the assets held within the fund can fluctuate down and up. Holding for a shorter period may mean that there is a higher chance that you get back less than the amount invested.

You're able to cash in your investment in this fund before the end of the recommended minimum holding period, and we will not charge you to do this.
